# **Product Specifications**

## 1. Scope

This specification shall be applied to the batteries from IData Technology Limited's product.

### 2. Product Type and Product Model

**2.1 Type:** Polymer Li-ion Recharged Battery

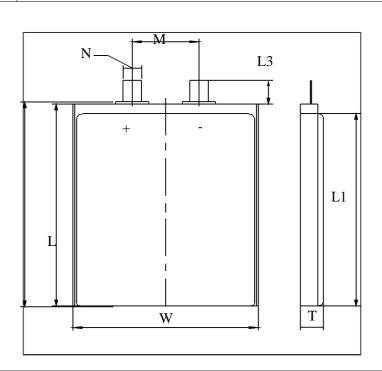

**2.2 Model:** DTP802540

### 3. Product Basic Characteristics

| No   | Item                                 | Characteristics   |  |  |
|------|--------------------------------------|---|--|--|
| 3.1  | Rated Capacity                       | 660mAh  |  |  |
| 3.2  | Minimum Capacity                     | 660mAh  |  |  |
| 3.3  | Nominal Voltage                      | 3.70V   |  |  |
| 3.4  | Charge Limited Voltage               | 4.20V   |  |  |
| 3.5  | Discharge Cut-off Voltage            | 2.75V   |  |  |
| 3.6  | End-of-charge Current                | 0.01C   |  |  |
| 3.7  | Standard Charge                      | Charge with 0.2C(132mA) up to Limited Voltage, Charge with            |  |  |
| 3.7  | Standard Charge                      | limited Voltage up to end-of-charge current.                          |  |  |
| 3.8  | Standard Discharge                   | Using 0.2C(132mA) constant current discharge to the Discharge Cut-off |  |  |
| 3.0  | Standard Discharge                   | Voltage.  |  |  |
| 3.9  | Maximum Continuous Charge Current    | 0.5C (330mA)  |  |  |
| 3.10 | Maximum Continuous Discharge Current | 0.5C (330mA)  |  |  |
|      | Operating Temperature Range          | Charge 10 ~ 45 °C   |  |  |
| 3.11 | Operating Temperature Range          | Discharge $-20 \sim 60^{\circ}$ C                                     |  |  |
|      | Storage Temperature Range            | -20 ~ 60℃   |  |  |
| 3.12 | Operating And Storage Humidity Range | 65 ± 20% RH   |  |  |
| 3.13 | Weight                               | Less than 14.0 g  |  |  |

### 4. Cell Dimension

| Item | Dimension (mm)      |
|------|---------------------|
| пеш  | Difficusion (IIIII) |
| Т    | Max8.0              |
| W    | Max 25.0            |
| L    | Max 40.0            |
| L1   | Max 36.0            |
| L2   | Max 40.3            |
| L3   | 8.0±0.5             |
| М    | 12.0±1.0            |
| N    | 2.0±0.1             |

File.No: E-SPE-0612-01

Ver: 00 Page: 5/11 Date: 2020-11-25

## **Product Specifications**

### 5.Appearance

It shall be free from any defects such as remarkable scratches, breaks, cracks, discoloration, leakage, or middle deformation

### **6. Basic Electrical Characteristics**

| No. | Items                                | Criteria  | Test Method   |  |
|-----|--------------------------------------|---|---|--|
| 6.1 | Open Circuit<br>Voltage              | 3.75V∼3.95V   | Measure with voltmeter.   |  |
| 6.2 | Internal<br>Impedance                | ≤140mΩ  | Measure cells using an alternate current impedance meter at 1kHz.   |  |
| 6.3 | Rated Capacity (0.2C <sub>5</sub> A) | ≥660mAh   | Discharged after the standard charged cells rest 10min at 23±2°C, Test can be discontinued when more than Rated capacity. Three cycles are permitted  |  |
| 6.4 | 1C <sub>5</sub> A.discharge capacity | ≥660mAh×90%   | Discharged after the standard charged cells rest 10min at $23\pm2^{\circ}\mathrm{C}$ , Test can be discontinued when more than 90%*rated capacity. Three cycles are permitted.  |  |
| 6.5 | Temperature<br>Characteristics       | 1. Appearance: No deformation \( \) ruptures nor leakage \( \) 2. Discharge Capacity: 55 °C: \( \geq 85 \% \times \) initial capacity; -10 °C: \( \geq 60 \% \times \) initial capacity | Measured the 0.2C5A capacity at $23\pm2^{\circ}$ C as the initial capacity. Stored the rechargeable batteries for 16-20hrs at $-10\pm2^{\circ}$ C; 2h for $55\pm2^{\circ}$ C, and then 0.2C5A discharged at this temperature, Checked the batteries' appearance after rest for 2 hrs at room temperature. |  |
| 6.6 | Storage<br>Characteristics           | Retention Capacity: ≥85% × initial capacity   | Measured the $0.2C_5A$ capacity at $(20\pm5)^{\circ}C$ as the initial capacity. Stored the recharged cells for 6 days at $20\pm5^{\circ}C$ and then rest for 2 hrs at room temperature, $0.2C_5A$ discharged after checked the cells' appearance.   |  |
| 6.7 | Cycle Life<br>(20°C)                 | Capacity≥initial capacity× 80%  | $0.2C$ discharged after $0.2C_5A$ full charges at $20\pm5^{\circ}C$ .Carry out 300 cycles   |  |

# Remark 1 Standard charge: $0.2C_5A$ charge up to charge limited voltage at $(20\pm5)^{\circ}C$ . Charge with limited voltage up to end of current. It is the same to the next content

### **7.**Safety Characteristics

| No | . Items | Criteria                      | Test Method  |
|----|---------|-------------------------------|--|
| 7. |         | Appearance: No rupture, fire, | When the battery is fully charged, go on loading for 8h with a twice rating voltage, 2.0C <b>5</b> A out put current, it starts the over charge protection function. |

File.No: E-SPE-0612-01

Ver: 00 Page: 6/11 Date: 2020-11-25

# **Product Specifications**

| 7.2 |                                  | Appearance: No rupture, fire, smoke, nor leakage.                  | The battery is discharged at 0.2C <b>5</b> A in the constant current till it reaches over discharge protection voltage at $(20\pm5)$ °C, connected with a $30\Omega$ lead and discharged for 24h   |  |  |
|-----|----------------------------------|--|--|--|--|
| 7.3 | Short-circuit<br>Characteristics | OCV ≥3.6V;<br>Appearance: No rupture,<br>fire, smoke, nor leakage. | As the battery has completed charging, short circuit the positive and negative contacts with $0.1\Omega$ resistor for 1h for appearance check, then disconnect the resistor between the contacts, the battery shall be charged at $1.0C5A$ mA in the constant current for $5S$   |  |  |
| 7.4 | Hot Oven<br>Characteristics      | Appearance:No explode.No fire.                                     | The battery is to be heated in a gravity convection or circulating air oven after standard charged at $23\pm2^{\circ}\text{C}$ , The temperature of the oven is to be raised at a rate of $5\pm2^{\circ}\text{C}$ /min. The oven is to remain for 30 minutes at $400\pm2^{\circ}\text{C}$ before the test is discontinued. |  |  |
| 7.5 | Heavy<br>Collision               | Appearance:.No explode.No fire.                                    | Putting the battery on the platform, using 10KG heavy hammer free drop from 1M height onto the fixed battery.  |  |  |

# Remark 2 All safety characteristics are carried out by specialized personnel familiar with Li-ion knowledge or under instruction of our technical personnel after detailed consultation.

### 8. Reliability Characteristics

| No. | Items   | Criteria   | Test Method   |  |  |
|-----|---|--|---|--|--|
| 8.1 | Static Humidity<br>and Temperature<br>Characteristics | ≥60%× initial capacity Appearance: No leakage, damage ,smoke, rupture. | Measured the 1C5A capacity at $23\pm2^{\circ}$ C as the initial capacity. Stored the rechargeable batteries for 2 days at $40\pm2^{\circ}$ C and 90%-95%RH, then rest for 2 hrs at room temperature. 0.2C5A discharged after checked the batteries appearance. Measured recoverable 1C5A discharge capacity with 3 cycles |  |  |
| 8.2 | Vibration<br>Characteristics                          | OCV ≥3.6V;<br>Appearance: No fire, leakage,                            | After fully charging, fixing the battery onto the vibration platform. with amplitude 0.38mm circularly scanning vibrating in the frequency of 10HZ-55HZ from three directions X、Y、Z for 30min respectively in its scanning frequency velocity 10CT/min.   |  |  |

# **Product Specifications**

| 8.3 | Bump<br>Characteristics      | OCV ≥3.6V;<br>Appearance: No fire, leakage,           | After vibration testing, use a clip or directly fix the battery on to the platform in the direction of X、Y、Z vertical complementary axis, then adjust its acceleration and pulse duration as below to have a bump test. Pulse peak acceleration 100m/s2. Bumps per minute 40-80.Pulse duration 16ms. Bump times 1000±10.     |
|-----|------------------------------|---|--|
| 8.4 | Free Drop<br>Characteristics | ≥85% ×nominal capacity. Appearance: No fire, leakage, | After bump testing, the battery shall be immediately dropped from the height of 1000mm (minimum height) onto a 18mm~20mm hard board on the cement floor. Free drop one time respectively from X、Y、Z positive and negative axis(six directions). After that, the battery is discharged at 1C <b>5</b> A to its final voltage. |

### 9. Assembling Request

### 9.1 List of Parameter

| Item                       | Symbol              | Content                             | Criterion              |
|----------------------------|---------------------|-------------------------------------|------------------------|
| O and I am a Double of the | $V_{\text{DET1}}$   | Over charge detection voltage       | 4.300V±0.050V          |
| Over charge Protection     | $tV_{DET1}$         | Over charge detection delay time    | 80 ms                  |
|                            | $V_{\text{REL1}}$   | Over charge release voltage         | 4.100±0.050V           |
| 0 1:1                      | $V_{\mathrm{DET2}}$ | Over discharge detection voltage    | 2.4V±0.100V            |
| Over discharge protection  | $tV_{DET2}$         | Over discharge detection delay time | 20ms                   |
|                            | $V_{\text{REL2}}$   | Over discharge release voltage      | 3.0V±0.100V            |
|                            | $V_{\text{DET3}}$   | Over current detection voltage      | 0.150±0.030V           |
| Over current protection    | $I_{\mathrm{DP}}$   | Over current detection current      | 2.5~4.5A               |
|                            | $tV_{DET3}$         | Detection delay time                | 10ms                   |
|                            |                     | Release condition                   | Cut load               |
| Chart protection           |                     | Detection condition                 | Exterior short circuit |
| Short protection           | T <sub>SHORT</sub>  | Detection delay time                | ≤5us                   |
|                            |                     | Release condition                   | Cut short circuit      |
| Interior resistance        | $R_{ m DS}$         | Main loop electrify resistance      | VC=3.6V; RDS≤60mΩ      |

### 9.2 Parts list

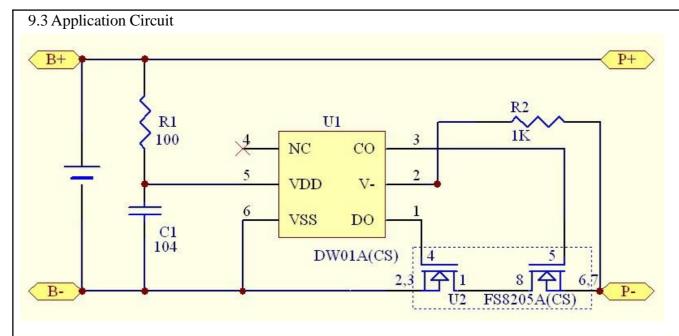

| NO. | Location | Part name             | Specification            | Pack type | Q' ty | Maker/Remark                                     |
|-----|----------|-----------------------|--------------------------|-----------|-------|--|
| 1   | U1       | Battery protection IC | DW01+                    | SOT23-6   | 1     | Seiko  |
| 2   | U2       | Silicon MOSFET        | 8205                     | SOT-6     | 1     | Shengzhen Cansheng Industry  Development Co.,Ltd |
| 3   | R1       | Resistance            | SMD $100 \Omega \pm 5\%$ | 0603      | 1     | YAGEO  |
| 4   | R2       | Resistance            | SMD 1K $\Omega \pm 5\%$  | 0603      | 1     | YAGEO  |
| 5   | C1       | Capacitance           | SMD 0.1 μ F              | 0603      | 1     | TDK  |
| 6   | PCB      | Print circuit board   |                          |           | 1     |  |

## **Product Specifications**

### 9.5 External Dimension Drawing

### 10. Guarantee Period of Quality

Guarantee period of quality is 12 months after sold.

#### 11. Matters needing attention

Strictly observes the following needing attention. IData will not be responsible for any accident occurred by handling outside of the precautions in this specification.

### ! Danger

- Strictly prohibits heat or throw cell into fire.
- Strictly prohibits throw and wet cell in liquid such as water, gasoline or drink etc.
- Strictly prohibits use leave cell close to fire or inside of a car where temperature may be above 60°C. Also do not charge / discharge in such conditions.
- Strictly prohibits put batteries in your pockets or a bag together with metal objects such as necklaces. Hairpins, coins, or screws. Do not store or transportation batteries with such objects.
- Strictly prohibits short circuit the (+) and (-) terminals with other metals.

File.No:E-SPE-0612-01 Ver: 00

Page: 10/11 Date: 2020-11-25

## **Product Specifications**

- Strictly prohibits welding a cell directly.
- Do not use a Cell with serious scar or deformation.
- Thoroughly read the user's manual before use, inaccurate handling of lithium ion rechargeable cell may cause leakage, heat, smoke, an explosion, or fire, capacity decreasing.

### ! Warning

- Strictly prohibits put cell into a microwave oven, dryer, or high-pressure container.
- Strictly prohibits use cell with dry cells and other primary batteries, or new and old battery or batteries of a different package, type, or brand.
- Stop charging the Cell if charging is not completed within the specified time.
- Stop using the Cell if abnormal heat, odor, discoloration, deformation or abnormal condition is detected during use, charge, or storage.
- Keep away from fire immediately when leakage or foul odor is detected.
- If liquid leaks onto your skin or clothes, wash well with fresh water immediately.
- If liquid leaking from the Cell gets into your eyes, do not rub your eyes. Wash them well with clean edible oil and go to see a doctor immediately.

### ! Caution

- Before using the Cell, be sure to read the user's manual and cautions on handling thoroughly.
- Charging with specific charger according to product specification. Charge with CC/CV method. Strictly
  prohibits revered charging. Connect cell reverse will not charge the cell. At the same time, it will reduce the
  charge-discharge characteristics and safety characteristics, this will lead to product heat and leakage.
- Store batteries out of reach of children so that they are not accidentally swallowed.
- If younger children use the Cell, their guardians should explain the proper handling.
- Before using the Cell, be sure to read the user's manual and cautions on handling thoroughly.
- Batteries have life cycles. If the time that the Cell powers equipment becomes much shorter than usual, the Cell life is at an end. Replace the Cell with a new same one.
- When not using Cell for an extended period, remove it from the equipment and store in a place with low humidity and low temperature.
- While the Cell pack is charged, used and stored, keep it away from objects or materials with static electric charges
- If the terminals of the Cell become dirty, wipe with a dry clothe before using the Cell.
- Storage the cells in storage temperature range as the specifications, After full discharged, we suggest that charging to 3.9~4.0V with no using for a long time.
- Do not exceed these ranges of the following temperature ranges.

Charge temperature range :  $10 \,^{\circ}\text{C}$  to  $45 \,^{\circ}\text{C}$ ; Discharge temperature range :  $-20 \,^{\circ}\text{C}$  to  $60 \,^{\circ}\text{C}$  .(When using equipment)

### 12. Statement

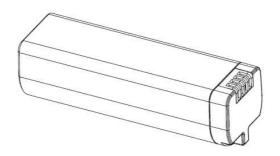

If our specifications material, product process or product control system has changed, the information will be transmitted to consumer by way of written with quality and reliability data.

File.No: E-SPE-0612-01

# **Product Specifications**

The battery pack should be disassembled from end product before disposal (which will be described in manual of end product). The instructions will be different from case to case depending on end product design. The battery pack itself should not be opened by customer before disposal.
